

CUSTOMER TESTIMONIAL

10" Random Rock Hole Openers

“We were on a particularly difficult job in Atlanta – trying to drill under the Chatahoochee River for a telecommunication company.

“Two competitive reamers had been left in the hole – halfway across the river!”

“As soon as we started reaming with the BHMT Random Rock Reamer, our driller noticed a dramatic improvement over the prior tools. The BHMT Reamer ran extremely smooth and drilled about 25% faster than the competition.”

“The BHMT 10” Random Rock Hole Opener drilled the entire bore in under 8 hours. The cutting structure is barely scratched!”
