# Defoamer

## Description
Defoamer comprises a range of proprietary products that control foam and entrained air in a range of drilling fluids.

## Functions
Defoamer is designed to effectively control foam and entrapped air in a drilling fluid being used for a wide variety of rotary and horizontal drilling applications. In addition to collapsing or breaking down existing foam, the products remain on the fluid’s surface to prevent the formation of future foam.

## Benefits
- Effective and long-lasting foam suppression.
- Improved operational efficiency.
- Ultra concentrated to reduce product usage.
- Readily mixable.
- May be used in fresh or salt water conditions.
- Non-toxic.

## Recommended Treatment
Add 0.1 to 2.0 litres per cubic metre of drilling fluid.

*Refer to Clear Solutions MSDS for health & safety guidance before handling and mixing.*

## Packaging
Defoamer is packaged in 25kg plastic drums, 24 drums per pallet. All pallets are stretch-wrapped.
