Pure-Bore® LV

Performance Technology for Cleaner Drilling

Description

Pure-Bore® LV is an environmentally friendly, non-damaging, next generation drilling fluid technology which can be used in a wide variety of drilling and completion applications.

Pure-Bore® LV nano-chemistry works synergistically in Pure-Bore® fluids. Through its unique membrane forming characteristics, Pure-Bore® LV enhances both fluid loss control and shale encapsulation, whilst minimising additional viscosity.

Pure-Bore® LV enhances drilling performance - significantly improving borehole stability with minimum viscosity for improved ECD management, whilst optimising reservoir protection.

Recommended Treatment

Slowly and uniformly mix Pure-Bore® LV into Pure-Bore® drilling fluid or water/brine using a high-shear venturi or colloidal mixer and continue to agitate/circulate until Pure-Bore® LV is fully dispersed.

Depending on application add at

0.5 – 2.5lb per barrel, or 1.5 – 7.0kg per cubic metre
Refer to Clear Solutions SDS for health and safety guidance before handling and mixing

Packaging

Pure-Bore® LV is packaged in the following;

- 25lb plastic bags (80 x 25lb bags per pallet)
- 25kg plastic bags (40 x 25kg bags per pallet)

No warranty express or implied, of merchantability fitness for a particular purpose or otherwise is made, except the product conforms to seller specifications. Buyer assumes all risk of use, storage and handling. Seller shall not be liable for any incidental or consequential damages arising directly or indirectly in connection with the purchase, use, storage or handling of the product.

**FOR INDUSTRIAL USE ONLY
PRODUCED IN THE UK**

Benefits

Hole Stability

Faster ROP

Reservoir Protection

Less Problems

Better Production

Reduce non-productive time

Cost Saving

Environmentally Friendly

Functions

- **Tight filter cake and solids free fluid loss control**
- **Shale encapsulation**
- **Low viscosity**
- **Low and non-progressive gel strength**
- **Reservoir protection**
- **Readily dispersible and easy to mix in fresh water or a range of saturated brines**
- **Temperature stable**
- **Chemically stable in the presence of a range of typical oil field contaminants**
- **Compatible with a wide range of oil field chemicals and minerals**
- **Effectively recycled through fine shaker screens**
- **Environmentally Friendly – CEFAS Registered**
- **PLONOR (Poses Little Or No Risk)**
