Clear-Gel™

Performance Technology for Cleaner Drilling

Description

Clear-Gel™ is a stable, easy mixing biopolymer additive used to control and increase the drilling fluid rheology and provide a high stable gel strength.

Recommended Treatment

Add slowly and uniformly through a high-shear venturi type hopper.
Add 0.5 - 2.5 kilograms per cubic metre of drilling fluid
or 0.2 - 0.9 lbs/bbl of drilling fluid.

Continue to agitate/circulate until Clear-Gel™ is fully dispersed.

Refer to Clear Solutions SDS for health and safety guidance before handling and mixing

Packaging

Clear-Gel™ is packaged in 25kg plastic pails, 27 pails per pallet.
All pallets are stretch wrapped.

No warranty express or implied, of merchantability fitness for a particular purpose or otherwise is made, except the product conforms to seller specifications. Buyer assumes all risk of use, storage and handling. Seller shall not be liable for any incidental or consequential damages arising directly or indirectly in connection with the purchase, use, storage or handling of the product.

Benefits

Hole Stability

Faster ROP

Reservoir Protection

Less Problems

Better Production

Reduce non-productive time

Cost Saving

Environmentally Friendly

Functions

- Designed to enhance the gel strength of drilling fluid for improved suspension and transportation of cuttings on long bores.
- Clear-Gel™ increases the low-end rheology for increased cuttings carrying capacity at low annular flow rates.
- Clear-Gel™ will perform efficiently in fresh water or salt water.
- Non-toxic and environmentally friendly.
- Improves suspension of bridging agents and weighting materials.
